

WEBINAR

**6 July 2020
2 PM GMT/UTC**

**RENEWABLES 2020
GLOBAL STATUS REPORT**

International Solar Energy Society

- ✓ The International Solar Energy Society, ISES, is a non-profit UN-accredited membership NGO.
- ✓ Our vision: 100% renewable energy for all, used efficiently and wisely.
- ✓ ISES represents a diverse membership of academics, researchers, energy practitioners, consultants, students, businesses and advocates.
- ✓ ISES works together with like-minded organizations from countries all around the world to advance the renewable energy transformation.

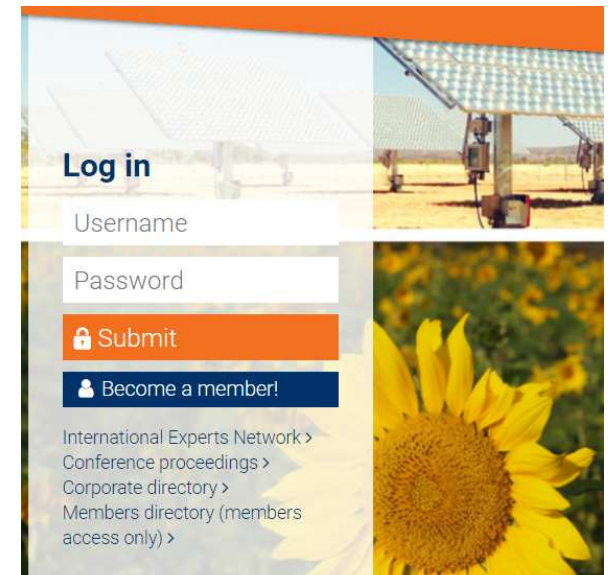

ISES Membership benefits

Exclusive content for ISES Members at www.ises.org

- ✓ Webinar – unlimited access to presentations from webinar panelists, webinar recordings
- ✓ Events - Members discounts or even free registration
- ✓ ISES monthly newsletters – follow our progress
- ✓ Solar Energy journal – discounted member rate
- ✓ ISES online bookshop - reduced prices

Questions and answers

Please type in your questions and we will try to answer as many questions as possible **during the webinar**.

Feel free to send in your questions any time throughout the webinar.

Keep your questions short and precise and write who your question is directed to, so that the moderator can assign directly to the corresponding panelist.

Moderator – Arabella Liehr

The webinar will be moderated by ISES Communications and Outreach Officer Arabella Liehr. Having graduated from Goldsmiths College at the University of London, Arabella brings her background in political science to the realm of solar and renewable energy following her research focus on democratic and sustainable societal processes. Arabella has joined the ISES team in 2018, working on the ISES webinars, outreach and publications, congresses and the ISES monthly newsletter.

Speaker – Duncan Gibb

Duncan Gibb, Project Manager and Analyst at REN21 will introduce the findings of this year's Renewables 2020 Global Status Report. With his background in Renewable Energy Management, Duncan is key to producing the GSR at REN21 and focusses his work on the research and analysis of renewable energy technologies, systems and markets with a special focus on renewable heating and cooling.
